

***Turf Europe Srl***

[www.turfeurope.eu](http://www.turfeurope.eu)

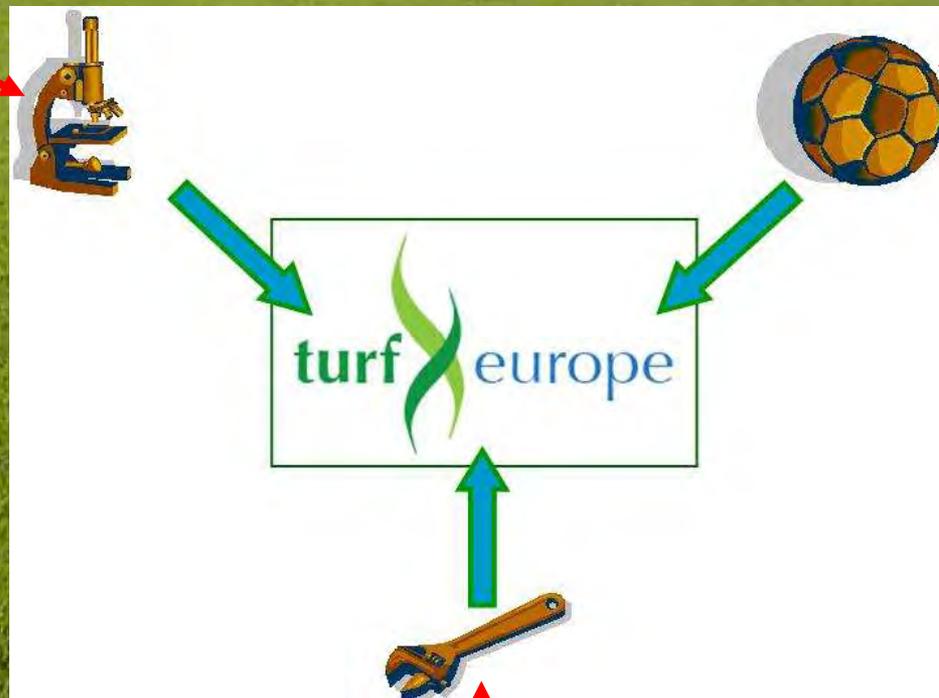

DIPARTIMENTO DI SCIENZE AGRARIE, ALIMENTARI E AGRO-AMBIENTALI

R & D

Consulenza e Formazione

Mercato

**KNOW-HOW**

**MERCATO**

## Specie

- per il Mediterraneo
- a propagazione vegetativa
- inerbimenti ambientali

## Materiali

- concimi a rilascio controllato
- macchinari avanzati
- substrati tecnologici

## Tecniche

- stolonizzazione
- idrosemina
- manti ibridi
- plantule per trapianto
- gestione integrata

**Turf Europe S.r.l.**  
**AGRONOMIA**

# Ornamentale (1)

## Ornamentale (2)

**Agricoltura (1)**

## 2009-2014

- Corsi di formazione professionale: **32**
- Totale partecipanti ai corsi: **oltre 600**
- Target dei partecipanti: **giardinieri, tecnici ed operatori del settore, impiegati aziende**

## Settembre 2013

- Organizzazione del **3° Field Days** della Società Europea dei Tappeti Erbosi a Monte Carlo
- “Integrated turfgrass management: towards the limitation of the use of agrochemicals”
- **98** partecipanti da **18** Paesi diversi

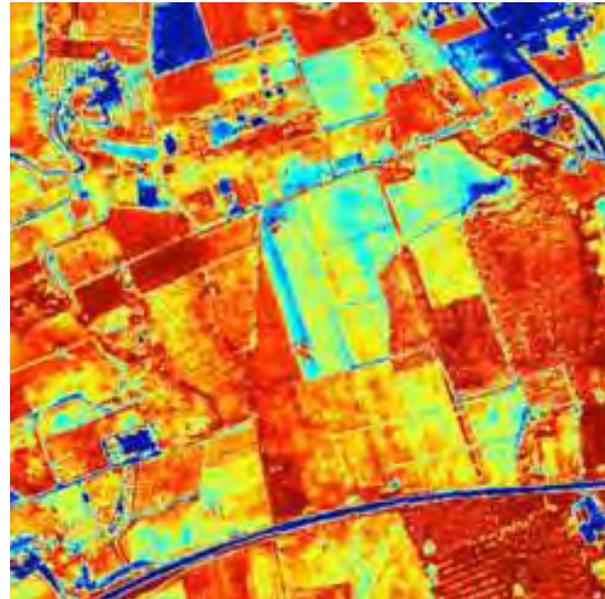

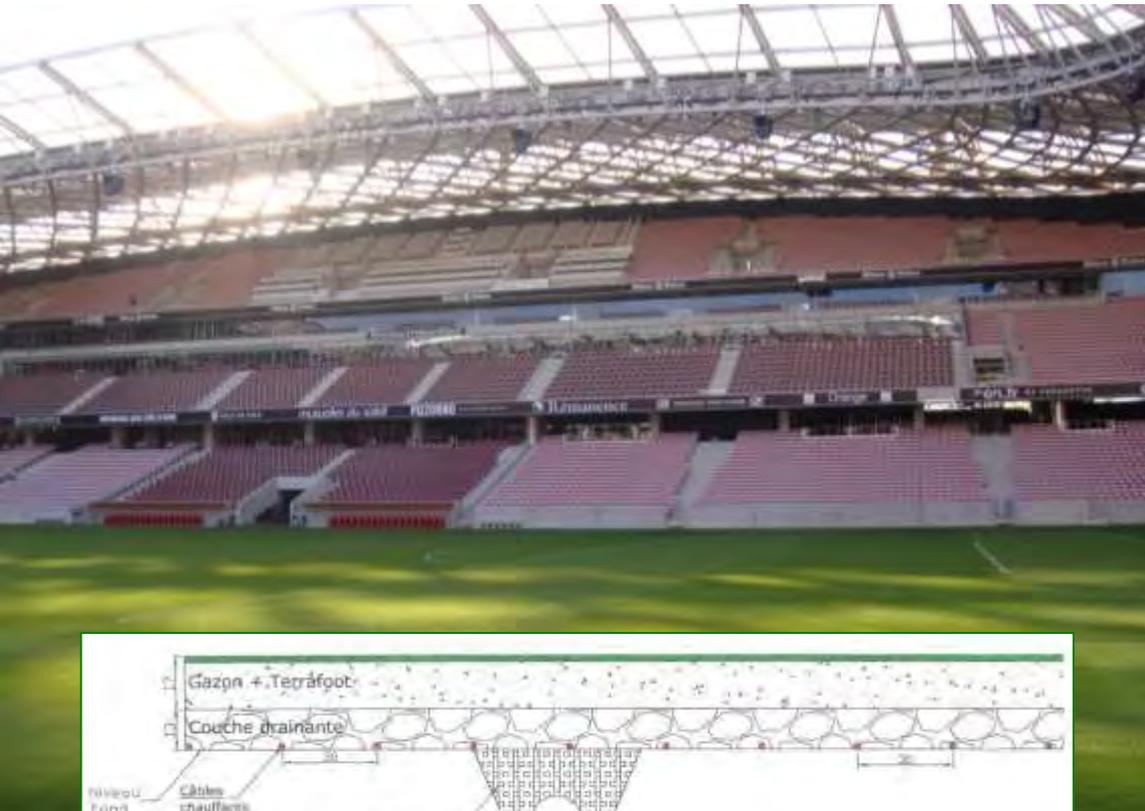

Dalla metà del 2012, per aumentare l'innovatività dei servizi proposti, l'Azienda ha iniziato ad operare in un settore altamente tecnologico dell'agronomia:

## “PRECISION FARMING”

“...information and technology based farm management system to identify, analyze and manage variability within fields, for optimum profitability, sustainability and protection of the land resource”.

- sensori
- immagini satellitari
- automatizzazione
- GPS, GIS, ecc.
- condizionamento artificiale

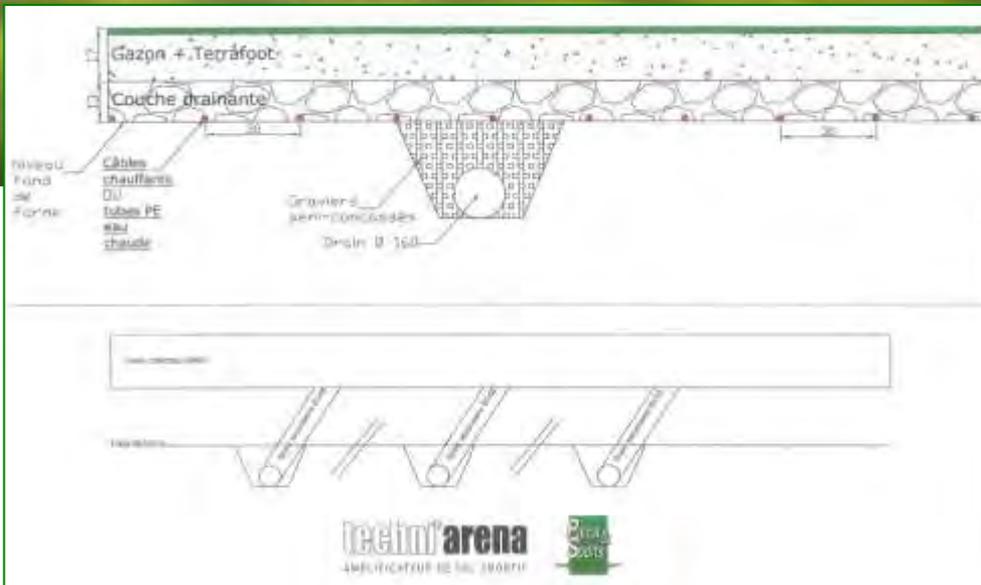

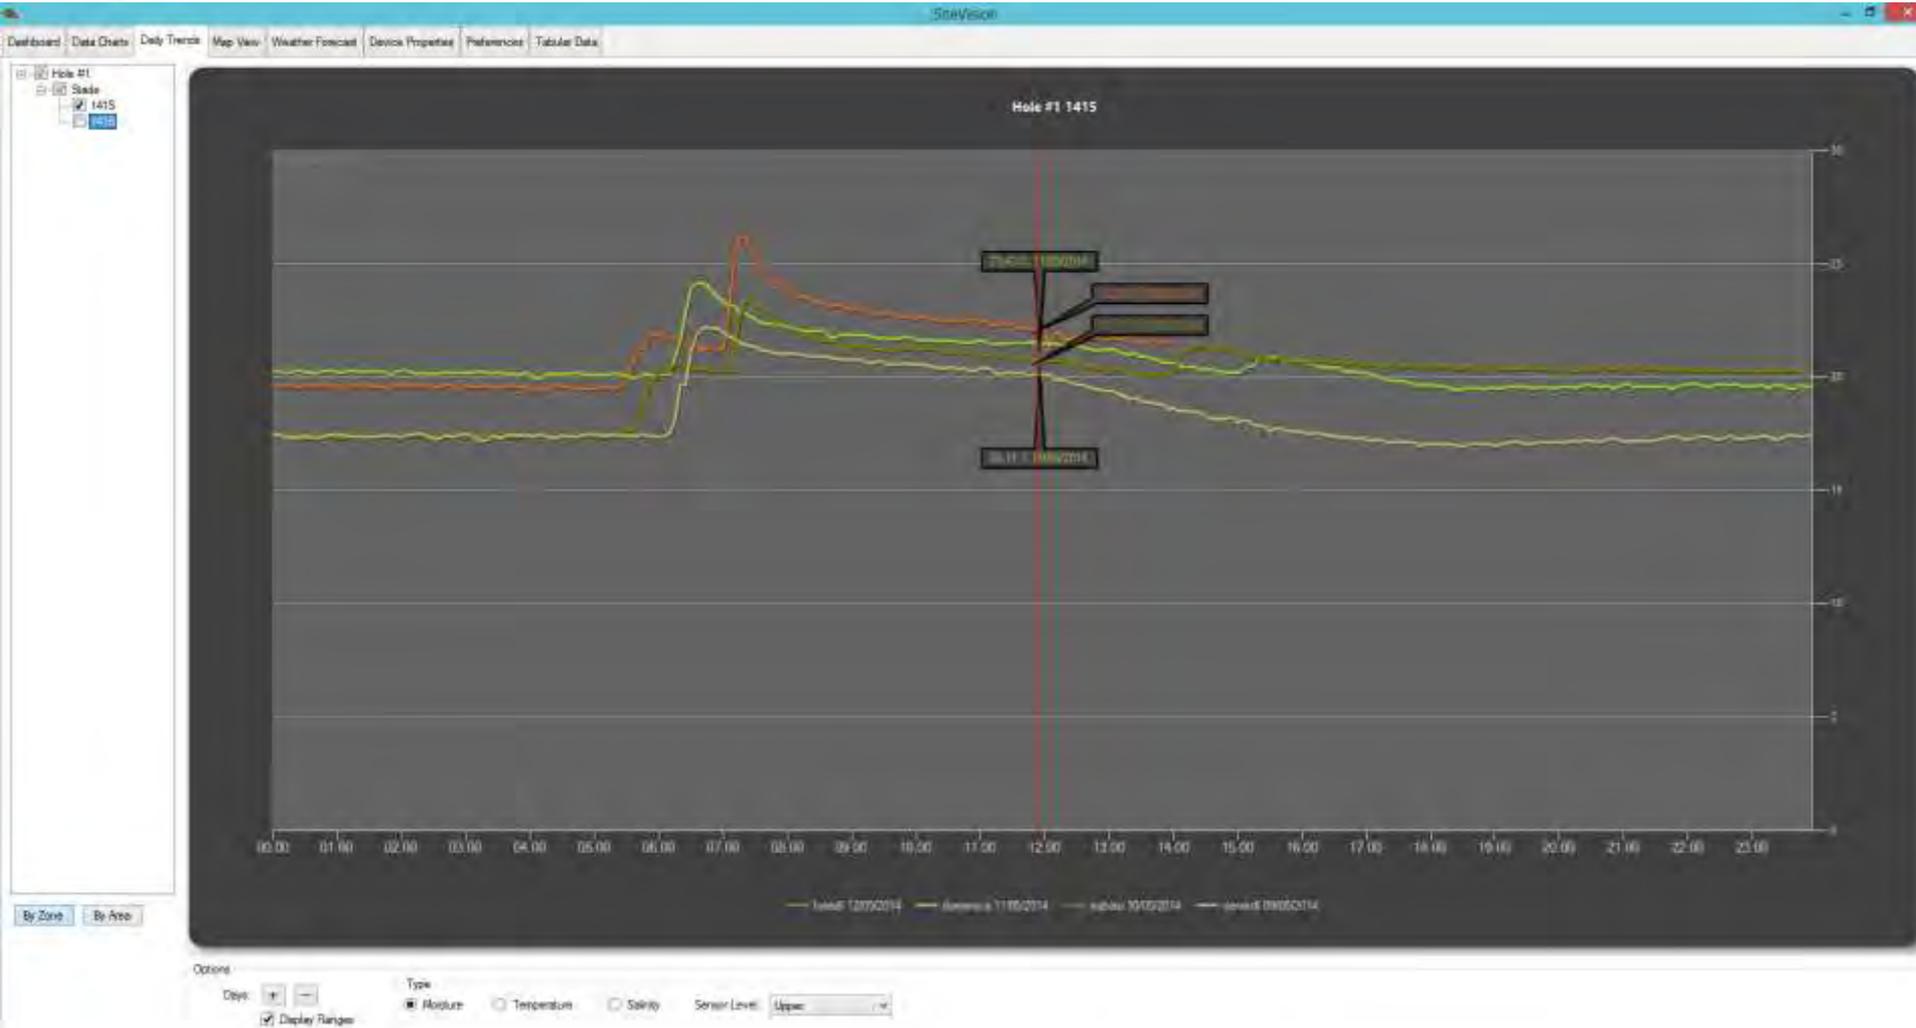

## Stadio "Allianz Riviera" di Nizza

Monitoraggio e messa a punto del sistema di ventilazione sotterraneo.

Sonde per monitoraggio in remoto (web) di T° e umidità del substrato.

**Monitoraggio in remoto di T° e umidità substrato: sonde wireless "Toro Turf Guard"**

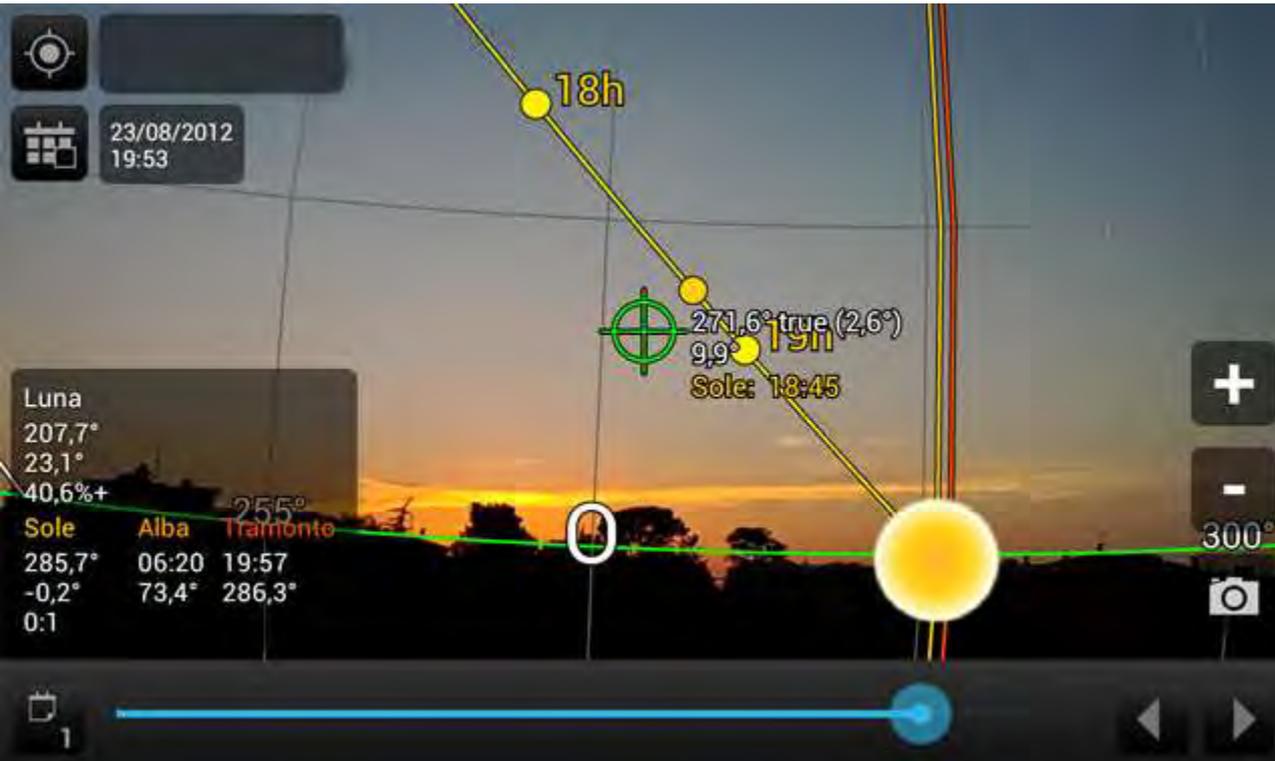

## Stadio "Vélodrome" di Marsiglia

Monitoraggio e messa a punto del sistema di illuminazione artificiale (sodio + LED).

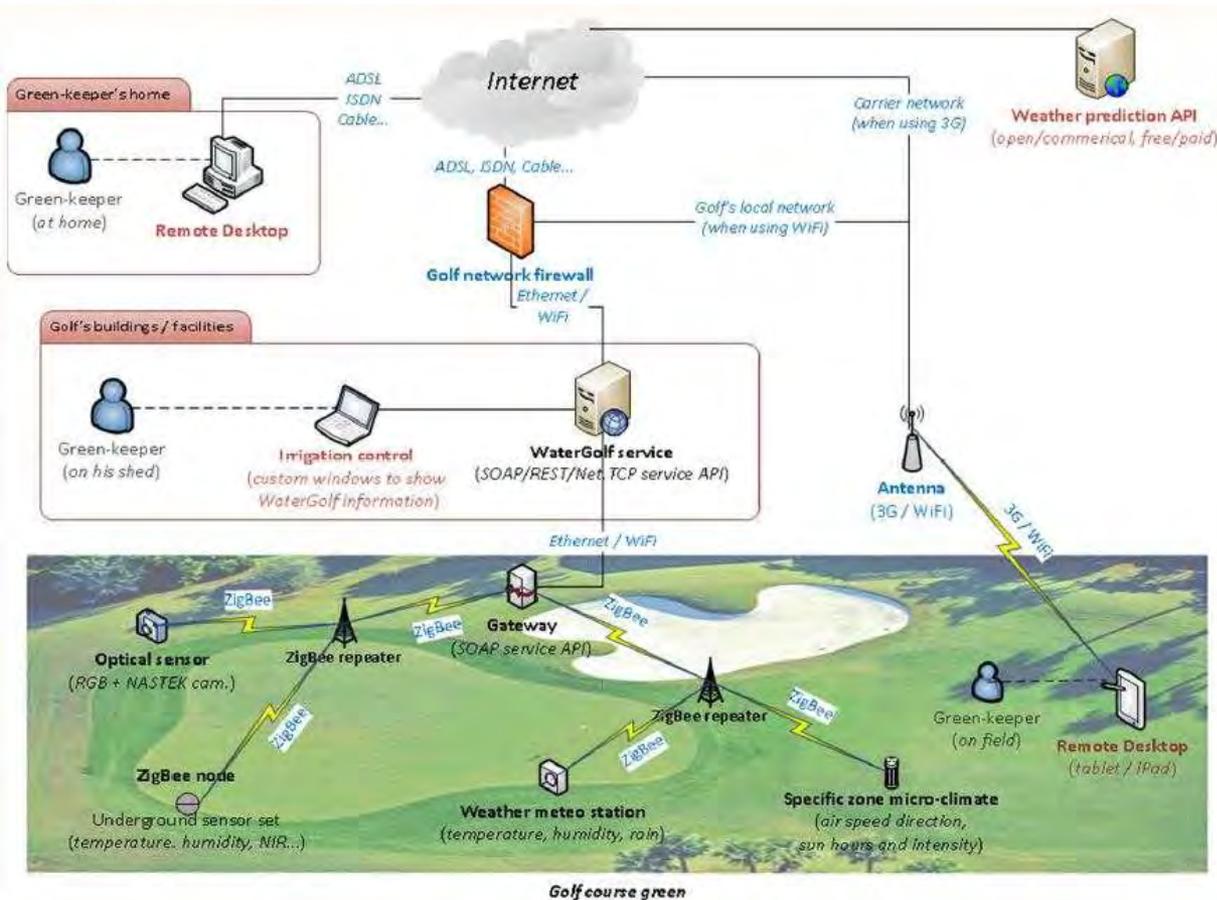

Fotometri e programma di valutazione dell'esposizione al sole...

Misura delle ore di radiazione solare: "SunSeeker" per Android

Misura dell'intensità della PAR ( $\mu\text{mol}/\text{m}^2/\text{s}$ ): "Apogee"

## Sistema "WaterGolf"

Sviluppo e messa a punto di un sistema di monitoraggio delle condizioni del campo di golf.

- Clusters di sensori nel terreno
- Centralina climatica
- Comunicazione Zigbee e wireless
- Artificial intelligence

## SODSAT

- The aim of the SODSAT project is to increase the competitiveness of turf grass producers by providing a novel remote intelligent turf management system by means of Artificial Intelligence and satellite technology.

[www.sodsat-project.com](http://www.sodsat-project.com)

The research undertaken in this project has received funding from the European Community's Seventh Framework Programme under grant agreement number 605729.

## **GaliGREEN**

Sviluppo e messa a punto di una app sperimentale (API + emulatore Galileo + software) basata su sistema Android (tablet o smartphone) per l'utilizzo del sistema EGNSS Galileo. Precisione = 1 cm...!

### Applicazioni:

- Agricoltura di pieno campo
- Verde urbano
- Ecologia
